

Fly with the wings

- Super slim
- Real 4Kx2K
- ARC function
- De-embedded audio
- Perfect control

The slimmest ever!

With **10mm** thickness, WUH4A is the world's first super slim version of its type.

Real 4Kx2K HDMI switcher

Strictly following the HDMI 1.4 standard from design to manufacture, WUH4A is real 4Kx2K: 4096x2160@30Hz/3840x2160@30Hz.

ARC function

The Audio Return Channel in HDMI 1.4 enables a TV, via a single HDMI cable, to send audio data "upstream" to an A/V receiver, increasing user flexibility and eliminating the need for any separate S/PDIF audio connection.

With ARC function, the audio can go "upstream" from TV, then reach WUH4A's separate audio output.

De-embedded audio

Simultaneously with the HDMI output, WUH4A supports one separate audio output, to work with any sound equipment, thus offering more flexible application.

- ◆ Auto/manual switch
 - ◆ IR
 - ◆ RS232
- Under control?
